PROFESSIONAL EXPERIENCE

Propel CPA — Toronto, ON

AI & Automation Specialist | 2026 – Present

- Audit CRM, email marketing, and operational workflows to identify process inefficiencies, automation opportunities, and data quality challenges.
- Assess business processes and evaluate AI and automation use cases to improve operational efficiency and reduce manual effort.
- Develop Python-based data cleansing and import automation tools to support data quality and operational workflows.
- Partner with business stakeholders to gather requirements, document workflows, and design AI-enabled solutions aligned with business objectives.

Oracle Advertising & Data Cloud — Seattle, WA

Senior Solutions Engineer | Technical Account Manager | 2018 – 2024

- Led technical solution delivery for enterprise advertisers, agencies, and data providers across audience activation, identity resolution, and data onboarding initiatives.
- Designed and implemented integrations with major advertising platforms including Google DV360, The Trade Desk, AppNexus, MediaMath, Adform, Amazon, and Facebook.
- Conducted technical discovery, solution design, implementation, troubleshooting, and post-launch optimization for enterprise clients.
- Resolved complex integration and audience delivery issues using SQL, APIs, automation, and platform diagnostics.
- Partnered with Product and Engineering teams to improve onboarding workflows, integrations, and platform capabilities.

Key Achievements

- Increased audience match rates by 78%.
- Improved IP-to-postal matching accuracy by 46%.
- Reduced issue resolution times by 24+ hours through automation.
- Supported integrations contributing to \$1B+ in media activation.

Oracle Advertising & Data Cloud — Toronto, ON

Technical Analyst | 2014 – 2018

- Supported audience onboarding, campaign delivery, integrations, and technical troubleshooting for enterprise advertisers and agencies.
- Performed SQL-based validation, QA testing, and data quality analysis to ensure successful audience activation.
- Collaborated with Engineering, Product, and Operations teams to resolve platform and integration issues.
